

Cooperative ITS Deployment in Logistics Hubs

CO-GISTICS Final Event and Demonstration

Thursday & Friday, 8-9 June 2017

Hosted by the University of Trieste with support of the CO-GISTICS partners.

Stazione Maritima | Trieste | Italy

The CO-GISTICS project consortium is proud to invite you to the CO-GISTICS final event and demonstration ***Cooperative ITS Deployment in Logistics Hubs*** taking place on 8 and 9 June 2017 in Trieste (Italy).

This conference is an opportunity to learn about CO-GISTICS project results and to experience live demonstrations of cooperative ITS applications for logistics. The event will start with a demonstration tour and continue with the opening session at the venue, including presentations by public authorities and private parties. Project results will be presented as well as discussions on the exploitation and future developments of CO-GISTICS. A second live demonstration with demo trucks will take place in a protected area next to the conference location on the second day.

The Trieste pilot is located in a strategic geographical position at the intersection between Far East-Europe shipping routes and the European TEN-T Mediterranean and Baltic-Adriatic Corridors. Trieste is a cosmopolitan city and the capital of the autonomous region Friuli-Venezia Giulia.

In the CO-GISTICS project, the Trieste pilot site addresses stakeholders' requirements by promoting the widespread development of ICT systems enabling information exchange and decision-making support: this will foster a more economic and environmental sustainable logistics chain.

The Trieste pilot site deploys the following cooperative logistics services in order to enhance the resources productivity, to reduce freight transport operational costs and negative externalities:

- Intelligent Truck Parking
- Speed Advice (Macro level)
- Eco-Drive Support
- CO2 Footprint Estimation and Monitoring:
- Cargo Transport Optimisation

REGISTER NOW

PROGRAMME (PROVISIONAL)

Thursday, 8 June 2017

- 14:30** Welcome and Keynote – Italian Ministry of Transport
- 14:45** Keynote – European Commission
- 15:00** CO-GISTICS project overview – ERTICO - ITS Europe
- 15:40** C-ITS for intelligent hubs – Port Authority of Trieste
- 16:00** C-ITS benefits for local authorities – Bilbao city council
- 16:20** C-ITS benefits for logistics operators – Codognotto
- 16:40** C-ITS interoperability and standardisation in logistics – ATOS
- 17:00** C-ITS benefits for users – IRU projects
- 17:20** CO-GISTICS in the new era: TM 2.0 innovation platform – TomTom
- 17:45** Welcome drink & buffet

Thursday, 8 June

Live demonstration departures

- 09:30** **Option 1 - Trieste Central Station** to Trieste Airport in Ronchi (participants arriving on 7 June)
- 10:45** **Option 2 - Trieste Airport** (flights arriving via Rome)
- 12:25** **Option 3 - Trieste Airport** (flights arriving via Munich)

The demonstration will be divided in 3 parts starting from 1) Trieste Airport to the Interporto di Trieste, 2) from Interporto di Trieste to the Port of Trieste and finally 3) from Port of Trieste to the event venue – Stazione Marittima.

Friday, 9 June 2017:

- 09:00** Overview of CO-GISTICS pilots – Teamnet
- 09:20** CO-GISTICS Services in Trieste – Trieste University
- 09:40** CO-GISTICS Services in real life – Geoloc Systems
- 10:20** Coffee break
- 10:50** CO-GISTICS Services impact assessment – HOLM
- 11:10** New Business models for C-ITS in logistics – IRU projects
- 11:30** Indoor demo
- 13:15** Closing session
